

VACUUM PRIMING SYSTEMS

RELIABLE THROUGH DESIGN

PRE-ENGINEERED, CUSTOM, SYSTEM OPTIONS

LYNN offers a complete line of high quality vacuum priming system designs. Standard models include a pre-engineered line of simplex and duplex vacuum priming systems for single or multiple pump requirements.

When project specified systems are required; **LYNN** excels at providing full compliance in system design and construction. Specification assistance during the design stage assures your client will receive the most appropriate and economical solution for their needs.

Automatic systems for maintaining continuous prime & air removal.

On-Demand systems for establishing prime on as needed basis.

LYNN Priming Valve Assembly designs configured to provide:

- Isolation
- Operator feedback
- Pump interlock
- Maintenance accessibility

LYNN offers accessories and features enhancing the performance, protection and operational control for any system.

- Automatic Purge Control
- Automatic Vacuum Tank Drain
- Special Application Construction
- Engine Drives
- Solar Power
- Vacuum Pump Type

SUPPORT CAPABILITIES

LYNN offers support and assistance to customers with proposed or existing vacuum priming system projects and installations. **LYNN** provides comprehensive support from pre-sale application assistance, product specification, installation oversight, through post-sale product support to ensure full customer satisfaction.

DESIGN AND SPECIFICATION ASSISTANCE

TYPICAL APPLICATIONS

Booster Pumps
Chiller Loops
Circulating Water Pumps
Condenser Exhauster Systems
Condenser Water Box
Desalination
Dewatering Pumps
Dockside Support Pumps
Fire Pumps
Floating Surface Collector
Irrigation Pumps
Membrane Filtration
Off Loading Systems
Pool/Fountain Pumps
Rainwater Collection
Raw Water Supply & Recovery
Seawater Intake Pumps
Shipboard Pumps
Siphons
Slurry Transfer
Stormwater Management
Water & Wastewater Treatment

FEATURES

- Maximizes pumping capacity through removal of entrained air
- Ability to prime multiple pumps
- Allows most efficient selection of pump to application
- Requires minimal maintenance
- Sized to meet your specific requirements
- Standard designs featuring industry leading components
- Customizable to meet any specific application requirement
- Available with full two year warranty

WHY LYNN

With vacuum priming system installations throughout the world, the designs and construction of **LYNN**'s systems have evolved through years of performance demanding reliability.

Where other manufacturers produce the “one design fits all”, **LYNN**'s designs have addressed your top concerns:

- Maintenance
- Energy efficiency
- Integrated control systems
- Longevity
- Application specific materials
- and above all uninterrupted prime with unsurpassed system reliability.

Each **LYNN** system is produced under our Quality Management System meeting the requirements of the international standard ISO 9001:2008, and furnished with a Factory Acceptance Test report.

LYNN offers a comprehensive range of support capabilities from application analysis and project specification assistance through commissioning and training.

- Knowledgeable experts, Support capabilities
- Correct sizing for peak performance & ROI
- Specification compliance, Timely production
- Low maintenance, Energy efficient
- System reliability, Longevity
- Flexible design capabilities, Competitive pricing
- Two year warranty on standard **LYNN** systems

DOING BUSINESS WITH LYNN

WOSB-Woman Owned Small Business
Certified MSHA 5000-23

NAICS Codes:

- 221310-Water Supply & Irrigation Systems
